Date of Certificate

**Annex to Final Certificate**

The Supervising Engineer should make a site inspection not less than once per year. During the inspection the Supervising Engineer shall note the following.

- a) Check the embankments and ensure there has been no movement or localised settlement
- b) Check the toe of the embankments for evidence of seepage.
- c) Ensure that the overflow is functioning and clear of debris
- d) Check that the water level board has been installed and that the water levels are recorded
- e) Ensure that the grass is cut back at least 2 times per year
- f) That the trees and saplings are maintained
- g) That the reservoir record book (PFR) is kept up to date
- h) That no works have been carried out in the vicinity of the embankments that could prejudice the safety

If the Supervising Engineer is concerned at any time about the safety of the reservoir, they shall formally request a Statutory Inspection under Section 12(3) of the Reservoirs Act.
